ANUJ MATHUR

Data Science&AI | Content& Communication

8005726538 anuj.mathur20047@gmail.com github.com/AnujMathur44 linkedin.com/in/anujmathurr

PROFESSIONAL OBJECTIVE

Detail-oriented and customer-focused professional with experience in customer interaction, outbound calling, and admissions support. Skilled in handling customer queries, problem-solving, and building positive relationships through effective communication. Proficient in Python, SQL, data analysis, and basic machine learning concepts, with the ability to adapt quickly and work effectively in dynamic environments.

SKILLS

Programming Languages - Python, R, SQL
Data & Analytics: Pandas, NumPy, Matplotlib, Seaborn, EDA, Data Cleaning, Data Preprocessing
AI & Machine Learning: Supervised Learning, Classification Models, Generative AI, NLP
Tools & Platforms: GitHub, Jupyter Notebook, Power BI, Microsoft Excel, OpenCV, Canva
Soft Skills: Emotional Intelligence, Effective Communication, Employment Communication, Personality Development, Time Management, Critical Thinking.

EXPERIENCE

TimesPro, Jaipur, Rajasthan : Admission Partner (IIT & IIM) Feb 2026 – May 2026

- Partnering on IIT & IIM executive programmes
- Counselling candidates and matching them to programmes
- Managing end-to-end admissions and enrolments
- Skills gained: communication, relationship management, consultative sales

AU Ignite Future Skills Academy , Jaipur, Rajasthan : Data Science May 2025 – July 2025

- Learned core concepts of Python, SQL, and Machine Learning.
- Worked on real-world datasets to practice data cleaning, preprocessing, and visualization.
- Built small ML models (classification & regression) and presented insights with Power BI

PROJECTS

Laptop Health Checker [Link] – Developed a machine learning-based tool to analyze laptop performance and predict potential health issues. Processed 200+ samples, achieved 85% prediction accuracy, and built an interactive Streamlit interface to display diagnostics and recommendations.
Libraries used: Python, Scikit-learn, Streamlit

Hotel Booking Data Analysis – Analyzed a hotel booking dataset containing 119,000+ records to identify booking trends and predict cancellations with approximately 80% accuracy. Performed data cleaning, feature engineering, exploratory analysis, and visualization to generate actionable insights.
Libraries used: Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

Multilingual Voice Translator – Developed a multilingual voice translation application that converts speech or text input into a target language and generates translated audio output. The system integrates speech recognition, language translation, and text-to-speech technologies to provide seamless cross-language communication.
Libraries used: Python, SpeechRecognition, gTTS

Medicine Reminder System – Built a Python-based automation system that provides scheduled voice reminders for medicine intake. Designed with a modular architecture and robust error handling to ensure consistent performance, improve medication adherence, and minimise manual intervention.
Libraries used: Python, Scheduling, Automation

EDUCATION

Master of Computer Applications (MCA) - Artificial Intelligence and Data Science

Poornima University, Jaipur | Pursuing

Bachelor of Computer Applications (BCA) - Artificial Intelligence and Data Science

Poornima University, Jaipur | 2026

Higher Secondary - Humanities (CBSE)

Kendriya Vidyalaya No 3, Jaipur | 2023

CERTIFICATIONS

- Google Ads Measurement Certification (2026)
- Gen AI Unlocked (2026)
- NPTEL - Research Methodology (2025)
- NPTEL - Employment Communication (2025)
- NPTEL - Emotional Intelligence (2024)
- HackerRank - Python (2024)
- Great Learning - Python for Data Science (2024)
- Great Learning - Introduction to R (2024)
- HP Life - Data Science and Analytics (2024)
